DETAILED ACTION

1. Claims 1-26 are presented for examination.

INFORMATION DISCLOSURE STATEMENT

2. The information disclosure statements filed on March 18, 2004; May 24, 2004; and August 25, 2004, complies with the provisions of MPEP § 609. They have been placed in the application file, and the information referred to therein has been considered as to the merits.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 4. Claims 1-26 are rejected under 35 U.S.C. 102(e) as being anticipated by Holenstein et al. (Pat. No. 7,003,531 filed December 10, 2002, hereinafter Holenstein).
- 5. Regarding Claim 1, Holenstein teaches synchronization of plural databases in a database replication system.

Art Unit: 2167

The method and associated system for synchronization of plural databases in a database replication system as taught or suggested by Holenstein includes:

receiving one or more data requests from a client application over a first client connection (col. 5, lines 1-67, col. 6, lines 1-67, col. 7, lines 1-67, col. 8, lines 1-67, col. 9, lines 1-67, col. 10, lines 1-67), the one or more data requests requesting access to data of a first data file; associating a timestamp with each data request (col. 5, lines 1-67, col. 6, lines 1-67, col. 7, lines 1-67, col. 8, lines 1-67, col. 9, lines 1-67, col. 10, lines 1-67); forwarding requests to a first database management system capable of accessing the data of the first data file (col. 5, lines 1-67, col. 6, lines 1-67, col. 7, lines 1-67, col. 8, lines 1-67, col. 9, lines 1-67, col. 10, lines 1-67); forwarding each data request and each associated timestamp to memory (col. 5, lines 1-67, col. 6, lines 1-67, col. 7, lines 1-67, col. 8, lines 1-67, col. 9, lines 1-67, col. 10, lines 1-67); forwarding replication data to memory (col. 5, lines 1-67, col. 6, lines 1-67, col. 7, lines 1-67, col. 8, lines 1-67, col. 9, lines 1-67, col. 10, lines 1-67), the replication data is sufficient to indicate changes made to the data of the first file based on the data requests, wherein each replication data includes a timestamp (col. 5, lines 1-67, col. 6, lines 1-67, col. 7, lines 1-67, col. 8, lines 1-67, col. 9, lines 1-67, col. 10, lines 1-67); comparing timestamps of the replication data of one more requests(col. 5, lines 1-67, col. 6, lines 1-67, col. 7, lines 1-67, col. 8, lines 1-67, col. 9, lines 1-67, col. 10, lines 1-67); one or more requests are determined to be redundant to the one or more replication data based on the timestamps and forwarding the second database system capable of a

Art Unit: 2167

second data file access (col. 5, lines 1-67, col. 6, lines 1-67, col. 7, lines 1-67, col. 8, lines 1-67, col. 9, lines 1-67, col. 10, lines 1-67).

- 6. Regarding Claim 2, Holenstein teaches each timestamp comprises a location ID (col. 5, lines 1-67, col. 6, lines 1-67, col. 7, lines 1-67, col. 8, lines 1-67, col. 9, lines 1-67, col. 10, lines 1-67).
- 7. Regarding Claim 3, Holenstein teaches the location ID associated with the one or more data requests corresponds to an indication of a current location in a log file associated with the first database management system (col. 5, lines 1-67, col. 6, lines 1-67, col. 7, lines 1-67, col. 8, lines 1-67, col. 9, lines 1-67, col. 10, lines 1-67).
- 8. Regarding Claim 4, Holenstein teaches the location ID associated with the one or more replication data corresponds to the location in a log file associated with the first database management system (col. 5, lines 1-67, col. 6, lines 1-67, col. 7, lines 1-67, col. 8, lines 1-67, col. 9, lines 1-67, col. 10, lines 1-67).
- 9. Regarding Claim 5, Holenstein teaches the location ID comprises a sequence number and an offset (col. 5, lines 1-67, col. 6, lines 1-67, col. 7, lines 1-67, col. 8, lines 1-67, col. 9, lines 1-67, col. 10, lines 1-67).
- 10. Regarding Claims 6-16, the limitations of these claims have been noted in the rejection of claims 1-5 above. They are therefore rejected as set forth above.
- 11. Regarding Claim 17, Holenstein teaches a first system with a second system wherein at least a portion of a first data file of the first system is replicated in a second data file of the second system (col. 5, lines 1-67, col. 6, lines 1-67, col. 7, lines 1-67, col. 8, lines 1-67, col. 9, lines 1-67, col. 10, lines 1-67); determining a move communication

Art Unit: 2167

over a first connection between a client application and the first data file through the first system to a second connection between the client application and the second data file through the second system (col. 5, lines 1-67, col. 6, lines 1-67, col. 7, lines 1-67, col. 8, lines 1-67, col. 9, lines 1-67, col. 10, lines 1-67); and moving the communication to the second communication in a manner allowing the client application to not fail (col. 5, lines 1-67, col. 6, lines 1-67, col. 6, lines 1-67, col. 7, lines 1-67, col. 8, lines 1-67, col. 9, lines 1-67, col. 10, lines 1-67).

12. Regarding Claims 18-26, the limitations of these claims have been noted in the rejection of claims 1-5 above. They are therefore rejected as set forth above.

NAME OF CONTACT

13. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cheryl Lewis whose telephone number is (571) 272-4113. The examiner can normally be reached on 6:30-3:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Breene can be reached on (571) 272-4107. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.

(571) 273-4113 (Use this FAX #, only after approval by Examiner, for "INFORMAL" or "DRAFT" communication. Examiners may request that a formal paper/amendment be faxed directly to them on occasions.)

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist/ Technology Center (571) 272-2100.
